

Asia looks to IT Service Partners to leap on opportunity

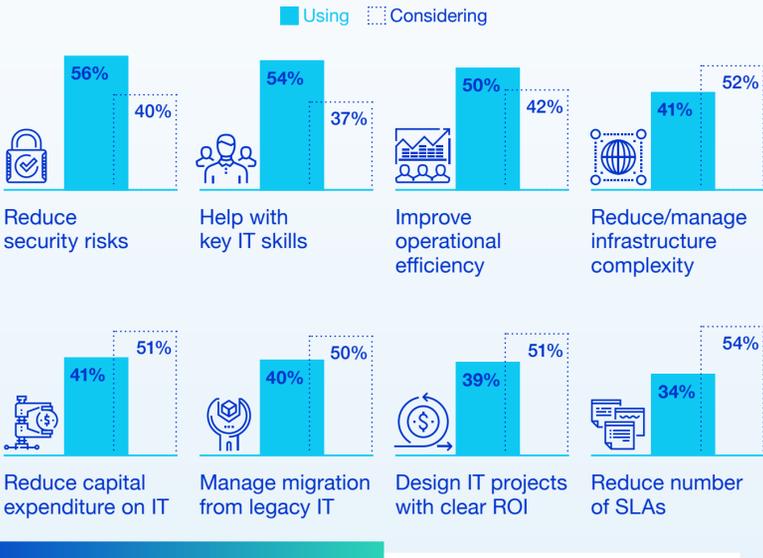

Security is the biggest challenge faced by companies managing IT in-house

Security leads a long list of concerns, stretching from problems of finding and keeping staff to budget pressures

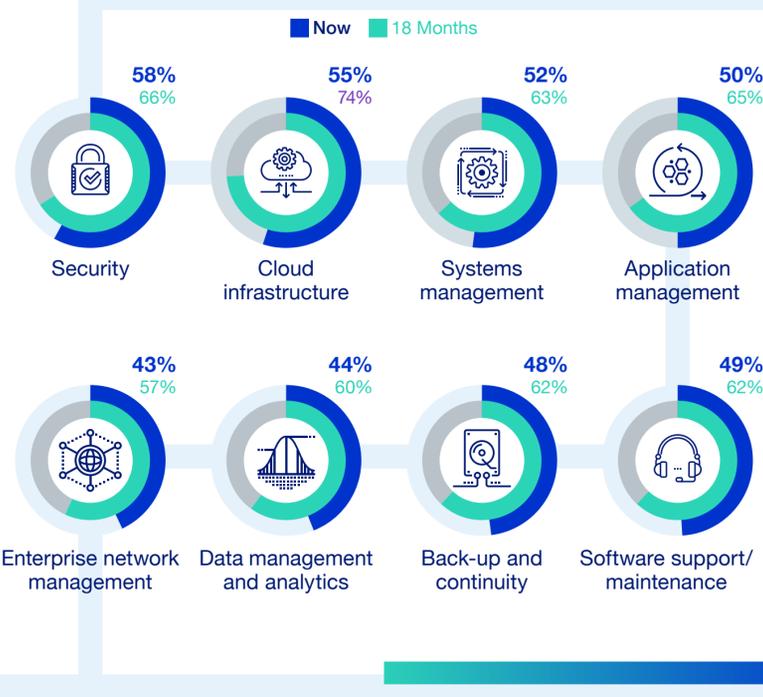

MSPs are called on to help across a wide span of areas

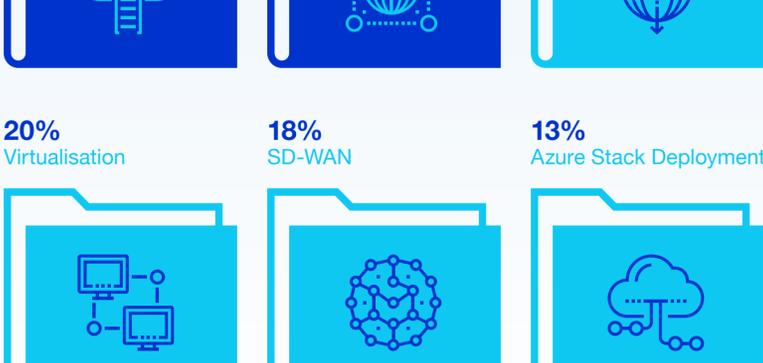

MSPs are in demand for a range of reasons as firms struggle to come to terms with everything from vendor and contract management issues to hard-to-come-by IT skills, general operational efficiencies and, of course, security. And they are currently considering even broader adoption...

Technology outsourced to MSPs is similarly broad

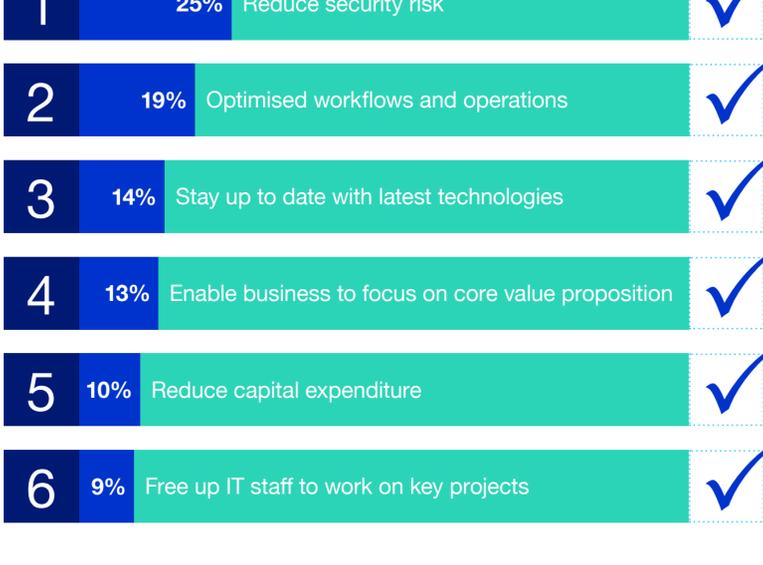

Cloud Migration and Managed Infrastructure are the biggest technology projects currently underway

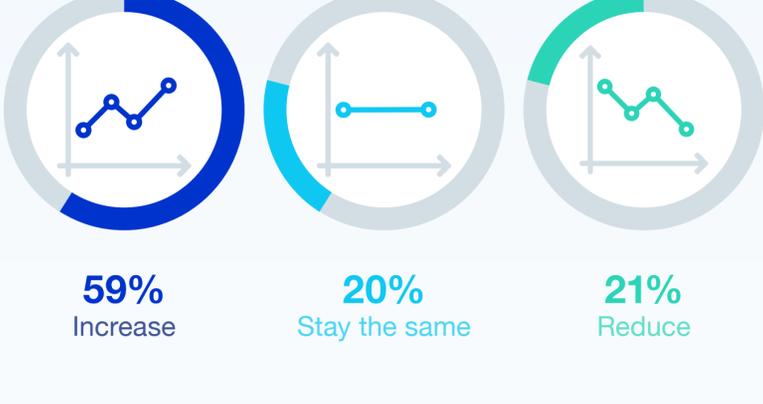

Six reasons to use MSPs

What are the most attractive aspects of using MSPs? Research suggests that improved operations, efficiencies and the scope to focus on core business are the leading factors

Most will increase their outsourcing

Outsourcing is well established in the region but those that outsource most are significantly increasing their investments

Singapore, Malaysia and Hong Kong will increase large-scale outsourcing disproportionately

Today 20% outsource over half of their IT, in 18 months that number will increase to 32%. In Malaysia the contrast is even greater with 16% outsourcing more than half today, and 37% expected to do so in 18 months' time.
